

Industrial Anti-Slip

Our range of heavy duty anti-slip covers are designed to improve grip and safety on all stairs, steps, ramps, floors, platforms, equipment and ladders, no matter how harsh the environment.

- Manufactured by Walksafe from a strong galvanised steel backing plate coated in a high strength epoxy resin encapsulating a hard wearing aggregate.
- Extremely tough, durable and resistant to almost all chemicals, oils, solvents and acids to be found in industrial applications.
- Suitable for all types and sizes of industry including Manufacturing Plants, Mines, Warehouses, Agriculture, Abbatoirs, Machinery etc.
- Stock sizes in Safety Yellow available "off the shelf" but custom sizes, shapes, colours etc. can be manufactured under the same pricing structure. Stainless steel backing plates and pre-drilling also available on request.
- Easy and quick to install on all surfaces including steel checker plate, grating, concrete, timber etc. Minimum surface preparation required and units are trafficable immediately after installation.
- On site recommendations and quotations available by a Walksafe representative in most areas, free of charge. Installation guidelines and hardware available.
