

Walksafe

Pedestrian Products

Anti-Slip Misc

Besides our anti-slip covers and treads, Walksafe also provide a range of other anti-slip and safety products to ensure every application has an effective solution.

Anti-Slip Tapes

- Manufactured from thin, yet strong, self adhesive vinyl with a silica grit upper surface.
- Suitable for all light to medium pedestrian traffic areas inside or outside.
- Available in a range of practical and attractive colours. Widths of 25, 50, 100 & 200mm and roll lengths of 5, 45.7 & 91.4m available.
- Quick and easy to install on almost any smooth and clean surface.

Anti-Fatigue Mats

- Made from durable natural rubber or Nitrile rubber for solvent resistance.
- Suitable for all workstations where people stand for prolonged periods.
- Greatly improves comfort and productivity.
- Available in a range of sizes and shapes, with ramped edges, modular and with and without drainage holes.
- Can be easily moved and cut to size if required.

Entrance Mats

- Made from durable rubber base with a crush resistant polypropylene pile.
- Suitable for all Commercial building entrances where there is heavy traffic.
- Prevents the ingress of dirt and water to keep your floor clean and safe.
- Available in a range of sizes and attractive colours. Suitable for all surfaces or rebates.
- Custom sizes available on request

Tactile Ground Surface Indicators (TGS)

- Manufactured from a durable composite material or stainless steel.
- Suitable for all areas of public access to assist the visually impaired.
- Available as tiles or individual studs.
- Can be installed on any clean, stable surface including concrete, asphalt, timber, stone paving, vinyl and carpet.
- Available in a range of colours to ensure the necessary contrast with the surrounding surface.
- Complies with all relevant Australian Standards.
